

# ANDROMETA

## WHITEPAPER

## Executive Summary

AndroMeta is a cross-chain ecosystem with four expertly handcrafted contracts, and multiple ways for holders to earn. Featuring a BSC token contract, a BSC staking contract, an ETH NFT contract, and an ETH NFT staking contract.

The main objective of the project is to deliver safe, passive, sustainable income to investors. This is achievable due to our team's extensive blockchain yieldfarming experience, and investor rewards linearly increasing with our worldwide marketing campaign.

To assemble the team, we handpicked specialists and experts whose previous projects have reached over 1.7 billion in market cap. Our developers, Elevate Software, have several successful BSC and ETH projects under their belt and 30 years of combined programming experience. Nobility, Rocket Coin, BoostCoin 2.0, and BitForex, are some recent projects. We leaned on that experience and created four efficient AndroMeta smart contracts from scratch.

We also brought on a professional crypto marketing agency, Ninja Promo. They're creating a full suite of daily visual content for us, growing our Discord, Telegram, social medias, and managing them 24/7.

On 17 May 2022, the daily trade volume of Ethereum was 18.7 billion. Eleven times greater than the volume of Binance Coin (1.6 billion) and greater than half of the volume of Bitcoin (29.2 billion).

This massive discrepancy in volume illustrates some of our cross-chain benefits. Most BSC projects lack diversification and are solely reliant on Binance volume. On the other hand, due to our ETH NFTs, AndroMeta has access to eleven times more volume and investors.

To incentivize holding, we'll offer top ADMT holders free mints and whitelist spots. Our collection will also be tradable on OpenSea and from mint you'll be able to stake and earn rewards.

HI!

## Introduction

One of the main goals of investing is passive income. It's the key to wealth since it allows you to not have to trade time for money.

Knowing this, it's unfortunate that most Web3 projects fail to provide consistent passive income for their holders.

Without consistent income or appreciating assets, investors are constantly losing money due to inflation and depreciation. Passive income takes it a step further by allowing investors to earn money without working. That distinction is what separates the wealthy from those who are not.

Many Web3 projects bait and switch, by promising unsustainable APYs then slashing their rates, causing big crashes. In BSC especially, many more carry out criminal acts like rugging or ghosting the project.

At the time of writing this, the market as a whole has been bearish. Everything from indexes like S&P 500, to stocks and cryptocurrency, has been on a downtrend for the last 7 months. Now more than ever, safe, passive, sustainable income is essential to gain wealth.

That understanding was the mindset behind AndroMeta. From inception in 2021, our mission has always been safe, sustainable income for our inventors. The current state of the market makes our cross-chain rewards ecosystem imperative. Investors have access to multiple passive income streams via BSC token staking and ETH NFT staking.

## Why AndroMeta

Between the constant Web3 noise and numerous amount of DeFi projects, you might find yourself asking...why AndroMeta? Well to understand what separates us from the rest, first look at the team. The anonymity of blockchain has led to rampant criminal behavior and widespread investor loss. To combat this directly, we've completed KYCs with Travladd, and The Exclusive Diamond Holders Club. We've also been audited by InterFi and have a CertiK audit scheduled soon.

Our developers and marketing team have several successful BSC, ETH and SOL projects under their belt, to the tune of over 1.7 billion market cap. In addition, all four AndroMeta contracts were efficiently written from scratch. Our entire visual content campaign is being designed and our Discord, Telegram and all social medias are managed 24/7 by a professional marketing agency.

We listened to our community and decided not to force BSC NFTs that no one wanted. Instead, AndroMeta NFTs will be launched on ETH and from mint holders will be able to earn ETH rewards from staking. Our NFTs will be tradable on OpenSea and a portion of sales will be injected directly into our staking pools.

Top AndroMeta token holders will get free NFT mints and whitelist spots. We're developing additional, out of the box utility that'll introduce and convert outside investors. For example, we're building the story behind AndroMeta, so investors can visualize a world connected to our NFTs. We're also considering developing a high-quality animated series, and ecommerce merch from our NFT collection.

We're working with an additional NFT sales specialist that has marketed and sold out multiple ETH and SOL collections. He'll be building out our NFT community on Discord and using proven methods to sell out the collection. We'll also target celebrities that love NFTs and introduce them to the world of AndroMeta.

For our token staking pool (ADMT rewards) and NFT staking pool (ETH rewards), we set out to create something long-lasting and sustainable. Our devs calculated exactly what would be required to sustain our staking pools long-term. We established multiple volume streams to feed our staking pools and have access to eleven times more volume than Binance since our NFTs are on ETH. To further fortify our staking pools and soften the impact of the bear market, we also tied them to our token tax so rewards increase as we grow.

## Q2

- LAUNCH DAY
- Develop community culture & promote holding incentives
- Establish skill rewards
- Update social links on BSCScan
- Set up banners on popular telegram BSC bots & websites
- Use top Telegram and Twitter influencers as a marketing catalyst
- Apply for CMC/CG
- Initiate two to three daily, engaging tweets from main social accounts
- Trend on Twitter consistently
- Create consistent content potential investors enjoy
- Start Worldwide Marketing with SEO, PR, Banner Ads, Partnerships and Social Media ADs
  - Hire top crypto YouTubers to post videos
  - Heavily incentivize votes, favorites and comments on strategic sites
  - Start daily BNB community giveaways
  - Begin NFT Marketing
  - Launch NFTs

## Roadmap

## Q3

- Upgrade website & logo
- Partner with crypto leaders and communities to ensure consistent trending & traffic
- Begin ETH Marketing with Marketing Agency
- Bridge to ETH & reward BSC holders
- Add additional utility that'll introduce & convert outside investors to Web3 e.g. animated series, ecommerce, etc.
  - Develop multiple passive income streams for loyal holders

## Token Distribution

Total supply: 100,000,000,000

Percentage of supply set aside for private sale: (20%)

Percentage of supply set aside for pancake swap: (5%)

Percentage of supply set aside for staking pool rewards: (60%)

Percentage of supply set aside for exchange listings: (15%)

Token price at launch: ((50,000,000/BNB)

Market cap at launch: (~\$600K)

Liquidity at launch: (100 BNB )

## Tokenomics

Buy Tax: 9%

Marketing: 3%

Development: 2%

Staking Pool Rewards: 3%

Team: 1%

Sell Tax: 9%

Marketing: 3%

Development: 2%

Staking Pool Rewards: 3%

Team: 1%

### Marketing

Our marketing campaign is worldwide and targets crypto investors where they hang out around the web. We've also partnered with a professional crypto marketing agency to take our project to the next level.

### Development

Creating sustainable passive income for our investors is our project's main goal. We're creating more passive income streams by developing additional utilities that introduce & convert outside investors to Web3.

### Staking Pool Rewards

We came together to create something long-lasting and sustainable. Our devs calculated exactly what would be required to sustain our staking pools. To further fortify them and increase rewards, we've also tied our staking pool's growth without tax so they grow proportionally.

### Team

From all corners of the globe we assembled a legendary team of professionals & specialists. They are all the best in the space at what they do and deserve compensation. So without question, their payment is factored in.

## ETH NFTs

- Blockchain NFTs reside: Ethereum
- Number of NFTs in collection: 10,000
- Number of NFTs traits: 6
- NFT Marketplace: OpenSea
- NFTs current utility: Stake NFTs and earn passive ETH rewards
- NFTs future utility: TBD. Considering animated series & merch

\*upcoming NFT sneak peeks\*

## Team Overview

### Founders

**Booyah, CEO** - Business Development & Project Management professional in the Pharmaceutical and Technology industries for the past decade. Social butterfly and connected to several insider BSC and ETH groups. Worked for multiple Crypto projects as an advisor. Founder of 'The Palace' AMA group.

**Baloutski, COO** - Logistics expert with 8 years of experience carrying out leadership duties. Overseer of operations for several businesses. Student of crypto with experience dating 3 years.

**Jedi, CMO** - Biomedical Engineering graduate. Founded a digital marketing agency, grew several ecommerce stores to six figures and scaled client businesses to seven figures. Conversion optimization & copywriting specialist with extensive connections in BSC and ETH communities. Founder of 'Jedi Calls'.

### Core Team

**Ammo, Head of Community** - Communications veteran and community management guru. Certified in Communication Studies. 5 years of experience in the financial sector and 6 years of customer relations experience. Led multiple teams as main community head.

**Hafidh, Project Advisor** - Cryptocurrency pioneer. Miner of ETH, RVN and many more. 11 years of experience as a Veterinary Doctor. 9 years of experience as a Medical representative. Over 8 years studying blockchain technology.

### Developers

**Chase, Ben & Matt** - Elevate Software expert solidity developers. 30+ years of combined programming experience. Previous projects reached over 1 billion in market cap.

### Marketing Team

**Marketing Agency, Ninja Promo** - Professional, award-winning crypto marketing agency with multiple offices around the world. Responsible for over half a billion in sales. Experts at growing Discord, Telegram, and Social Media Communities to hundreds of thousands.

## Closing Message

### MESSAGE FROM THE ANDROMETA TEAM

We want to conclude by thanking everyone that has played a part in bringing our vision for the project to fruition. Without each and every one of you, we wouldn't be where we are today. From project inception, our mission has been passive income for our investors. We're making it our duty to put holders first and will always do things to benefit you all.

When our NFTs are ready to mint, we will offer top token holders free mints and whitelists spots. Our collection will also be tradable on OpenSea so new investors will have a fair chance to buy. Our staking platform and our NFTs will be live simultaneously, so from mint, you'll be able to stake and earn rewards.

We're excited to go on this journey with you. Join the AndroMeta family on your favorite socials to stay updated and win daily prizes.
